Mixing Rates

Backpack Sprayer, 4 Gallon Size:
5 ounces of Arsenal® herbicide per 4 gallon backpack (1% solution)

A full sprayer of Arsenal should treat approximately 4,000 square feet (10 ft. x 400 ft.). If you spray 2 feet wide, a sprayer full will treat 2,000 feet of fence line.

Note: Always add a high quality, non-ionic surfactant: 2 ounces per 5 ounces of Arsenal or 5 ounces MSO or a 1% solution.

Hand Sprayer, 3 Gallon Size:
4 ounces of Arsenal per 3 gallon sprayer

A full sprayer of Arsenal should treat approximately 3,000 square feet (10 ft. x 300 ft.). If you spray 2 feet wide, a sprayer full will treat 1,500 feet of fence line.

Note: Always add a high quality, non-ionic surfactant: 1.5 ounces per 4 ounces of Arsenal or 4 ounces MSO or a 1% solution.

4-Wheeler, 20 - 25 Gallon Tank:
32 ounces (1 quart) of Arsenal per 20 gallon tank

A full spray tank with Arsenal should treat approximately 1/2 acre. If you spray 2 feet wide, a sprayer full will treat 2 miles of fence line.

Note: Always add a high quality, non-ionic surfactant: 8 ounces per 32 ounces of Arsenal.

High Volume Power Sprayer – Handgun:
64 ounces (2 quarts) of Arsenal per 100 gallons of water, spray to wet.

Note: Always add a high quality, non-ionic surfactant: 1 quart per 100 gallons of water per 2 quarts of Arsenal.

Broadcast Application:
64 ounces (2 quarts) of Arsenal per acre in 20 to 50 gallons of water per acre

Note: Always add a high quality, non-ionic surfactant: 1 quart per 100 gallons of water per 2 quarts of Arsenal.

Caution – Stay at least two drip-lines away from desirable trees and shrubs.
