

Colorfast™

Concentrated Marking Dye

GENERAL DESCRIPTION

- Ideal for pesticide applications
- Leaves bright colored mark
- Prevents overlapping
- Lasts for several days

Colorfast is a concentrated water-soluble dye that is specifically designed for use in marking pesticide applications. This dye leaves a brilliant-colored mark on treated surfaces.

Since Colorfast is so concentrated, it only takes a small amount to dye a lot of pesticide. When you use Colorfast, you can see where you've sprayed, preventing expensive overlapping that can waste expensive pesticides.

Bare ground, dense vegetation or light colored soils will show the mark better than dark colored surfaces. Under normal use the colored mark will last for several days prior to dissipation by moisture or normal sunlight.

PACKAGING

Colorfast Red and Purple are available in 4x1 gallons.

RECOMMENDED RATES

Applications

- Spray Marking: 2-6 oz. Colorfast per 100 gal. solution (59-177 ml per 379 liters solution)
- Backpack Sprayer: 1 oz. Colorfast per 3 gal. solution
- Dye Marking Machines: 3 oz. Colorfast per 5 gal. solution (89 ml per 19 liters solution)

A dye marker pressure range of 25-35 psi is recommended to ensure good mark placement. Drop hoses are recommended for adverse conditions such as high winds. For solid or straight line applications, a flat fan spray tip leaving a 4-5 inch band is recommended.

DIRECTIONS FOR USE

Add Colorfast to the spray tank after all pesticides and water have been added. Always check compatibility prior to mixing.

A jar test is strongly recommended to ensure pesticide compatibility with Colorfast.

Colorfast is compatible with: 2,4-D Ester or Garlon® 4.

Colorfast is NOT compatible with: 2,4-D Amine, Garlon 3A, Banvel® (Dicamba), Velpar L, or premixes containing these products.

This product contains glacial acetic acid. Colorfast is a highly concentrated dye and should be handled with organic acid-resistant gloves, goggles, and clothing as necessary to prevent skin contact when mixing. Dispose of in accordance with state, federal and local regulations. Keep out of reach of children. Avoid ingestion or contact with skin. In case of eye contact, flush with water for at least 30 minutes. Consult a physician immediately. In case of ingestion, dilute with water or milk but do not induce vomiting. Consult a physician immediately. See Material Safety Data Sheet (MSDS) for additional information. Do not utilize this product to color or mark grain or crops intended for sale as a food or feed.

Banvel® is a registered trademark of BASF. Garlon® is a registered trademark of Dow AgroSciences LLC. Velpar L® is a registered trademark of E. I. du Pont de Nemours and Company.
